

PAPER SHREDDERS

Good reasons for the purchase of

"Quality Paper Shredders"

PAPER SHREDDERS

Great offers for cheap product copies!

Walmart 

real- 

TESCO 

Woolworths

Media Markt 

Carrefour

... very cheap, isn't it ?

PAPER SHREDDERS

But: What about the safety of such machines?

The **CE** label confirms that our products correspond to the **European** and **international safety regulations**.

Furthermore, our machines are safety-tested by a neutral and independent institution (e.g. the German "Berufsgenossenschaft"). We hold the German "**GS**"-sign, respectively the American "**UL**"-certification.

PAPER SHREDDERS

Quality certificate ISO 9001:2015!

Already **since 1993**, Krug & Priester has an accredited quality management system.

This is the basis for a constant **first-class** production process. It is also the basis for the **CE-labelling** of our machines.

In addition, all other divisions of our company are subject to **ISO 9001:2015**.

Many Chinese products often misuse the "CE" as an abbreviation for "Chinese Export"!

Such cheap copies represent a big risk for the user of a machine!

PAPER SHREDDERS

Environmental Certificate ISO 14001:2004

A certificated environment management system underlines our strive for sustainability and careful handling of resources and energy.

Krug & Priester document shredders were the first to receive the **Blue Angel Award** for its energy efficiency and environmental friendliness.

While our products help to **protect the environment** and to reduce our customer's **electricity costs**, cheap copies made in China increase unnecessarily your electricity costs.

These cheap copies have a negative and longlasting impact on our future!

PAPER SHREDDERS

Energy Certificate ISO 14001:2004

Krug & Priester document shredders offer its customers an unique energy saving function.

"Zero Energy Consumption" is an energy saving function which ensures automatic and complete power cut-off after 30 minutes in stand-by mode and thus zero energy consumption after 30 minutes in stand-by mode.

This function allows our customers to save energy and therefore protect our environment.

Cheap copies increase your electricity costs and pollute the environment.

PAPER SHREDDERS

The first impression can be wrong ...

COPY

Cheap product: Don't let yourself be fooled by the design. Please take a further look at the inside and check the quality.

Quality product: High-end quality level and solid workmanship - Made in Germany.

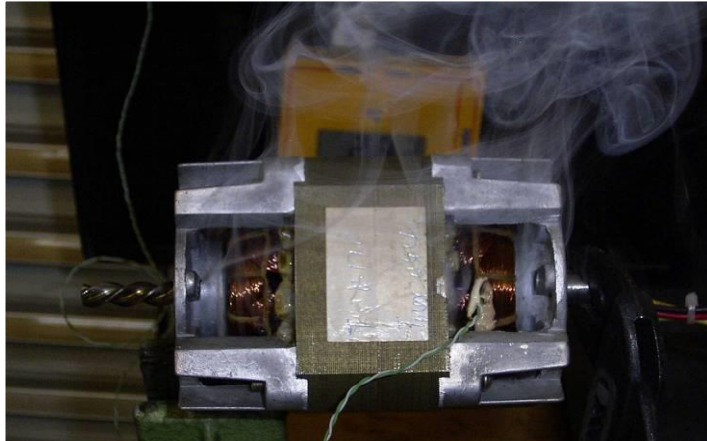

CONCLUSION = Our machines live up to their promise!

PAPER SHREDDERS

Cheap motors bear the risk of short circuits or even fire hazard!

COPY

Danger: Cheap shredders are equipped with motors which may overheat. There is no thermal protection.

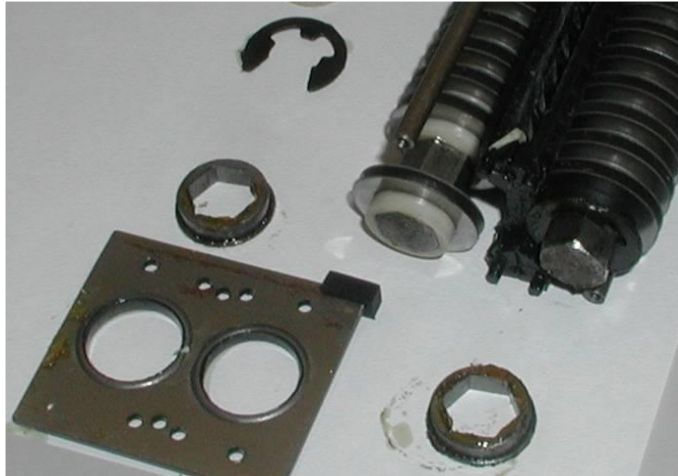

Safety: Efficient motors with double protection - protection against overheating and overloading.

CONCLUSION = Safety and longevity of our machines are guaranteed!

PAPER SHREDDERS

The core of a shredder.

COPY

Disadvantage: Simple cutting knives just put on an axle. Strong wear and tear of cutting shafts – metal is not hardened.

Advantage: Our cutting shafts are made of one single piece and of special hardened steel. Outstanding know-how for perfect geometry.

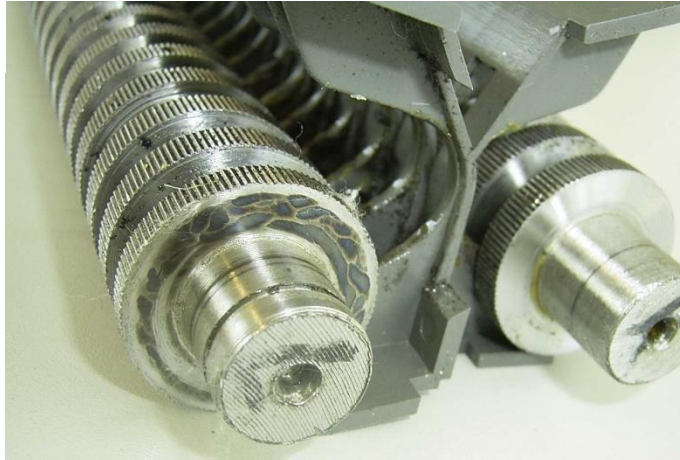

CONCLUSION = Optimal cutting quality and longevity are guaranteed!

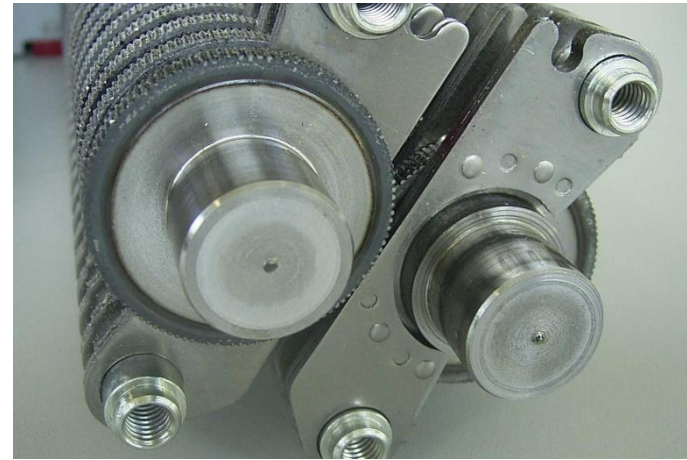

PAPER SHREDDERS

The devil is in the details!

COPY

Disadvantage: Low grade separators. Lack of stability due to missing reinforcements. Material can melt when getting hot.

Advantage: Perfect geometry of reinforcements through long-time experience and development. High-quality metal.

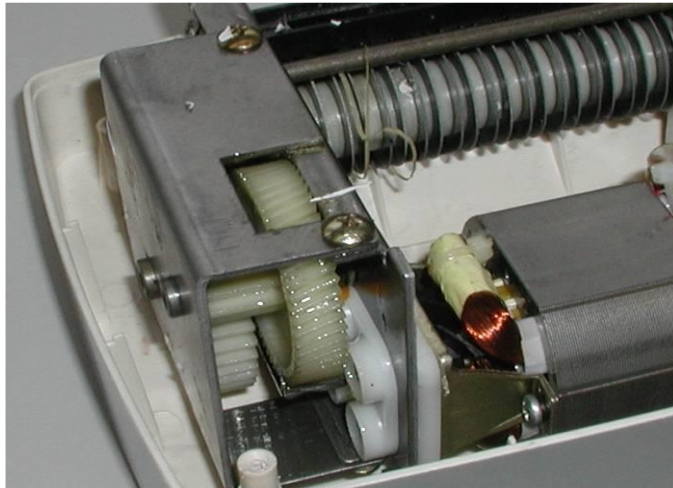

MADE IN
GERMANY
SINCE 1951

CONCLUSION = Perfect guidance of paper during shredding process.

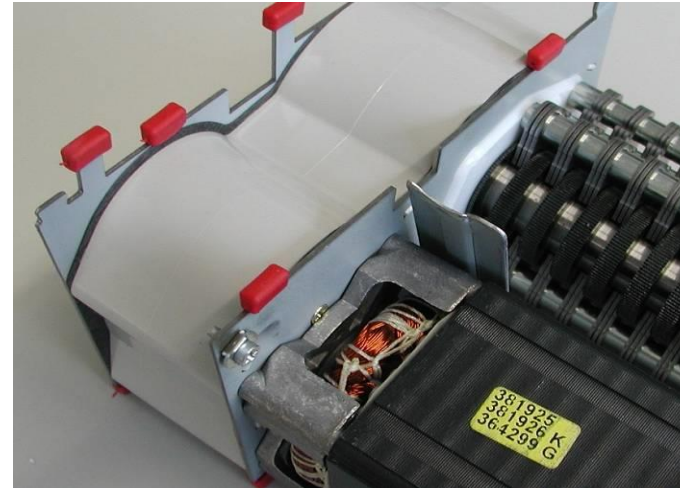

PAPER SHREDDERS

Let's take a look under the cover.

COPY

Disadvantage: Open gear-box.
Low quality gears which are causing noise and wear out quickly.

Advantage: Closed gearbox offer longevity and quiet operations.
Precise gears based on durable material.

CONCLUSION = Good performance and low sound level!

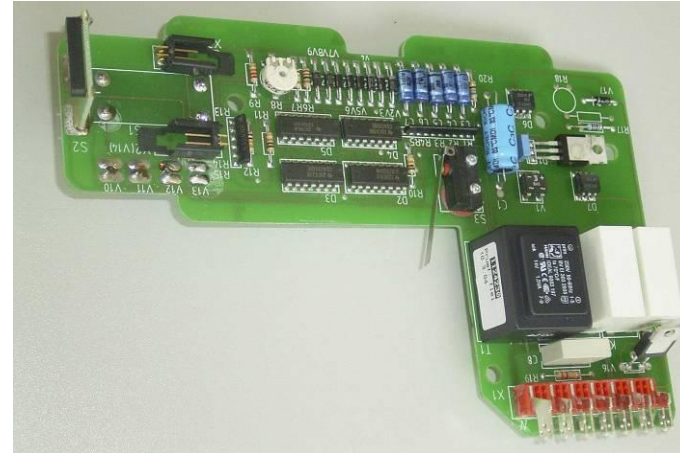

PAPER SHREDDERS

We do not save on electronic components!

COPY

Danger: PC-boards coated only from one side. Weakly soldered cables. Dangerous high-voltage on the PC-board!

Safety: PC-boards coated from both sides. Strong, reliable plugs. By using transformers, the voltage on PC-board is only 12 volt.

CONCLUSION = Safety and long life of our machines are guaranteed!

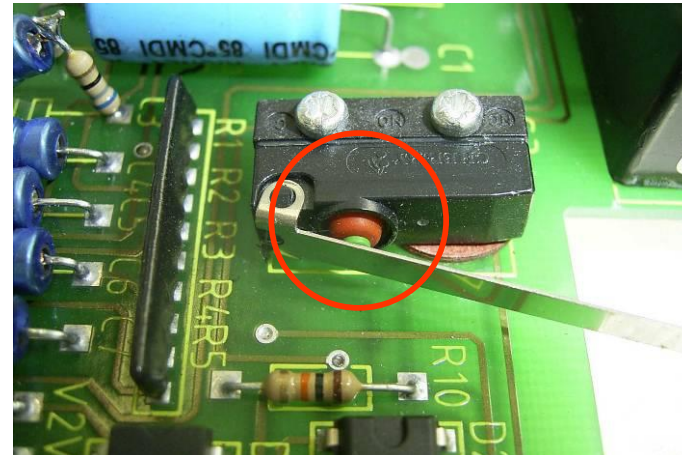

PAPER SHREDDERS

High-quality electronic components.

COPY

Danger: Easily jamming switches which are not protected against paper dust.

Safety: Our switches are reliable and dust protected.

CONCLUSION = Another source of danger is eliminated!

PAPER SHREDDERS

For the sake of the environment!

COPY

Disadvantage: Cheap shredders are made of easily breakable plastic and are difficult to recycle. No constant quality.

Advantage: Our shredders are made of break-resistant ABS-material. All parts can be recycled. Guarantee of constant quality.

CONCLUSION = Better protection of the environment and your nerves!

PAPER SHREDDERS

Recognizable quality.

COPY

Disadvantage: Cheap shredders have a shaky, weak cabinet made out of instabile plastics.

Advantage: High-quality wooden cabinets, as well as, bins based on good-quality plastic material.

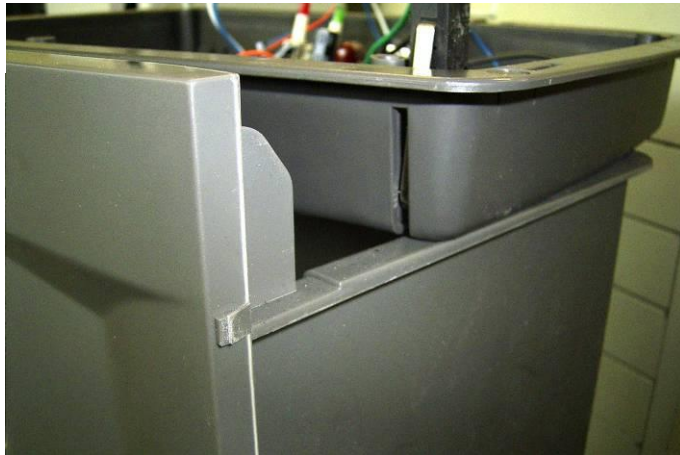

CONCLUSION = A visibly higher value of our machines.

PAPER SHREDDERS

Safety is not cheap!

COPY

Danger: If the machine head is taken off or the door is opened, the shutdown system can be easily manipulated.

Safety: Shutdown system runs via an invisible electronic switch. The switch cannot be over-bridged.

CONCLUSION = All possible risks are eliminated.

PAPER SHREDDERS

Design follows function.

COPY

Disadvantage: Cheap switches with lateral movement only. No status indication. These shredders are not convenient.

Advantage: Our shredders offer convenient operations via EASY_SWITCH. This multifunctional element has integrated optical symbols for the operational status.

CONCLUSION = Perfect function with fantastic design!

PAPER SHREDDERS

Highlights of EBA shredders

- Patented electronically controlled safety flap in the feed opening
- Control element "EASY_SWITCH"
- Automatic stop if bag is full
- Double motor protection
- Electronic door protection
- "Zero Energy Consumption" function ensures automatic and complete power cut-off after 30 minutes in stand-by mode and thus zero energy consumption after 30 minutes in stand-by mode.

Our high-performing and high-quality products **protect** its users from **data abuse** and **industrial espionage**.

PAPER SHREDDERS

Personal Long-Term Support

- **LIFETIME-warranty** for our cutter knives
- At least 15 years after the production fade out, customers will have access to spare parts
- Professional customer service

Aside from a great range of **high-quality products**, our company offers a **longtime warranty** to its customers!

Our personal long-term support enables our customers an **effortless handling** of our products.

PAPER SHREDDERS

Decide for the original – Made in Germany !

... and not for cheap products !
